Technical sorted

Our programmable messaging APIs and web hooks mean you can send messages from your systems or applications across any channel now and in the future. That's omnichannel messaging at its best.

A helping hand

Give agents the option to ask for backup. They can ping a supervisor to listen in or join a call and get advice in secret, without breaking stride.

Help them improve their service quality and ask for development help with shared Agent Evaluation.

Real-time data, better decisions

Supervisors have a clear view of activity across the contact centre. No more missed SLA breaches. Alerts keep them updated at any location. Customise dashboards and reporting to meet every need.

Connect and conquer

Be customer centric, offer them a choice of messaging channels. Liberty Connect offers an efficient way to consistently manage messaging today and in the future. And, use ChatBots too!
