Liberty RPA

AI-powered Robotic Process Automation ready for business and IT users.

Liberty RPA is a powerful tool that uses software robots to automate processes that would previously have been performed by people.

Process flows can be created by dragging-and-dropping elements onto a canvas and by using a range of standard activities that provide robust control of web browsers and standard applications such as Microsoft Office, SAP and others.

AI-powered RPA

Liberty RPA includes AI-powered computer vision. Unlike standard RPA tools which rely on fragile methods of data capture which easily break, Wand reduces failures, support and management costs while widening the scope of automation that can be addressed.

Integrated with Liberty Create

Liberty RPA perfectly complements Liberty Create, our leading low-code platform. Providing attended and unattended bots with the power of Create, allows for customer-facing activity that robots alone cannot do.

The results?

- Dramatically increased business performance and ROI

- Freed-up people and improved productivity

- Improved process accuracy, quality and scalability with human errors eliminated

- Integrated and automated data flows between systems

Key benefits:

- **Free-up people from mundane and repetitive tasks**

- **Processes performed to a consistently high standard and speed with 24/7 availability**

- **Easy process creation and scalability**

- **AI-powered bots for superior resilience and the ability to handle application changes**

- **Rapid ROI**

- **Support for attended and unattended bots**

- **Real-time bot management and reporting**

- **Integrated with Liberty Create**

"We were impressed at how RPA enabled our team to automate processes so quickly."

Belgian Hospital

Key features:

- **AI-powered process automation for performance and resilience**

- **Simple enough for business users with the power needed by IT users**

- **Rapid drag-and-drop process assembly**

- **Easy, cloud-based, one-click deployment**

- **Standard activities for robust control over browsers and standard apps such as Microsoft Office, SAP and others**

- **Cloud-based portal for bot management**

- **Service level monitoring**

- **Extensive integration options including additional options for Create**

- **Real-time reporting and analytics**

- **SaaS - consumption based pricing to accelerate deployment**

- **Part of the Liberty Platform with a strong focus on delivering great CX**

Extending process automation

The processes you need to automate today, may be the processes you need to reengineer tomorrow. With the combined power of RPA and Create you can redefine process automation, working at the pace that best suits your organisation. Why hold back on innovation?

Intelligent Automation

Combining AI-powered RPA with low-code opens up the possibilities for entirely new ways of working. The automation of mundane and routine tasks will allow the focus to be placed on winning and retaining business by delivering the best customer experience.

Key Features

Desktop Automation
Automate desktop interactions and processes cross-platform with Liberty RPA

Microsoft Office Automation
Pre-built activities for automating Office applications including Word, Excel, PowerPoint and Outlook

Remote Desktop Automation
Using Computer Vision, Liberty RPA can automate apps through remote desktop connections

Optical Character Recognition (OCR)
A complete OCR engine built into Liberty RPA

Business App Automation
Liberty RPA supports automation of SAP, Oracle, Salesforce and other back-end systems

Tabular Data Manipulation
With Liberty RPA, it's easy to aggregate and summarise tabular data

Computer Vision
Liberty RPA has built-in Computer Vision to recognise on-screen elements and text

Browser Automation
Automate tasks in any popular browser including Edge, Firefox, Chrome or Safari

Easily integrate with your existing systems

Liberty RPA offers extensive integration options including pre-defined activities for use with many industry standard applications. In addition, it extends integration options for Liberty Create by offering easy access to systems which may not provide API capabilities.

Put your foot down

Business transformation doesn't have to be a long and frustrating process. We can help you accelerate change cost-effectively, without breaking what already works. This is the power of process automation.

Part of the Liberty Platform

Liberty RPA is an integral part of the Liberty platform alongside Liberty Create, our low-code development platform, Liberty Converse, our complete contact centre, and Liberty Connect, our omnichannel messaging solution.

Focussed on delivering transformative customer experiences, Liberty now includes intelligent automation from front-to-back office that goes far beyond the reach of regular RPA or low-code tools alone.

The Liberty Platform delivers class-leading CX for a wide range of industries including financial services, insurance, utilities, healthcare and local government.
